

FOOD TO GO

PRODUCT CATALOGUE

PAK KLAIPĖDA

Friendly packaging

ALL OUR PACKAGES MADE FROM XPP

KEEPS FOOD HOTTER FOR LONGER

Exceptional insulating properties – keeping food hotter for longer by more than 10°C compared with alternative packaging solutions. It has a low heat transfer rate, retaining heat inside the packaging while keeping the outside cooler to the touch.

SAFE FOR HANDLING AND DELIVERIES

Safe handling and ability to stack trays on each other and sufficient stiffness is key factors important for rapid food delivery

FULLY RECYCLABLE

High quality plastic packaging that is easily recycled across the recycling process into a range of items, including other packaging, and household application. It is a part of circular economy and is highly demanded by recyclers.

MICROWAVEABLE

Allows food in the pack to be reheated while maintaining food safety and protection.

LIGHTWEIGHT AND CHEAPER

Lightweight and cheaper compared to alternative paper materials while maintaining durability with the added benefit of a lower carbon footprint.

WATER RESISTANCE & THERMAL ISOLATION

As a plastic, this packaging is naturally waterproof with no need for extra coatings or additives to keep it stable and robust to maintain food quality and thermal isolation to keep food Hot & Fresh.

RESISTANT TO HOT OILS, ACIDS AND ALKALIS

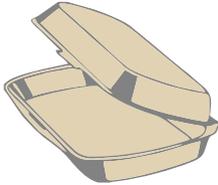

Assures best-in-class resistance to acids, alkalis and hot oils found in many foods and sauces. Packaging quality helps food to stay hot and fresh, without the risk of leakage and odour transfer compared to alternative paper, sugar cane pulp and carton board packaging.

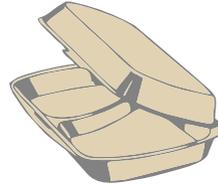

Is fully in compliance with sup directive

BOX DIMENSIONS (mm): 690mm x 400mm x 480mm

Pieces / box: 250 (2x15)

Net Weight: ~5.66kg

Gross Weight: ~6.30kg

Volume: 0.13248m³

TRUCK LOADING

Boxes / pallet: 15 box

Pieces / pallet: 3750

Pallets / truck: 32 - 36

Pieces / truck: ~120 000 - 135 000

Product Description:

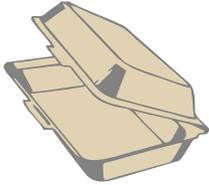

Product is a box for food made from the polypropylene beads by extrusion. These boxes, on the basis of test protocols, have no active substances that threaten human health or can cause unacceptable changes in food composition, and therefore are suitable for direct contact with food. PP box traps the heat, so the product is suitable for the packing of both warm and cool food.

Storage conditions

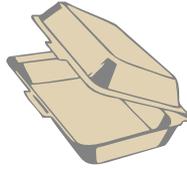

Max. +40 C°
Min. -30 C°
